Ninth House

ORPHAN, CLOCK KEEPER, AND THIEF, twelve-year-old Hugo lives in the walls of a busy Paris train station, where his survival depends on secrets and anonymity. But when his world suddenly interlocks with an eccentric girl and her grandfather, Hugo's undercover life, and his most precious secret, are put in jeopardy. A cryptic drawing, a treasured
notebook, a stolen key, a mechanical man, and a hidden message from Hugo's dead father form the backbone of this intricate, tender, and spellbinding mystery.

**On Beauty**

Chris Gayle is the only man to have ever hit a six off the first ball of a Test match. But then producing the impossible is an everyday act for the West Indies legend: the first man to smash an international T20 century, the first to hit a World Cup 200, the fastest century in the history of the game. Off the pitch he is even more flamboyant: he plays late, parties later, demolishes a king-size pile of pancakes and then strolls out to mangle another hapless bowling attack. But do we really know him? Do we know what took a shy, skinny kid from a cramped tin-roofed shack in the dusty back streets of Kingston to the very top of the cricket world – without losing himself along the way? A story not just of sporting genius but of battling prejudice, this unputdownable memoir will leave you reeling. Welcome to the world of the Six Machine.

**Why Don't Students Like School?**

In this Newbery Honor-winning novel, Gary D. Schmidt tells the witty and compelling story of a teenage boy who feels that fate has it
in for him, during the school year 1968–69. Seventh grader Holling Hoodhood isn't happy. He is sure his new teacher, Mrs. Baker, hates his guts. Holling's domineering father is obsessed with his business image and disregards his family. Throughout the school year, Holling strives to get a handle on the Shakespeare plays Mrs. Baker assigns him to read on his own time, and to figure out the enigmatic Mrs. Baker. As the Vietnam War turns lives upside down, Holling comes to admire and respect both Shakespeare and Mrs. Baker, who have more to offer him than he imagined. And when his family is on the verge of coming apart, he also discovers his loyalty to his sister, and his ability to stand up to his father when it matters most.

**The Time Machine Illustrated**

Presents a groundbreaking investigation into the origins of morality at the core of religion and politics, offering scholarly insight into the motivations behind cultural clashes that are polarizing America.

**The Book of Why**

'If the ball's there, hit it. Don't worry about what might happen. Play for the glory. Play for the six' Chris Gayle is the only man to have ever hit a six off the first ball of a Test match. But then producing the
impossible is an everyday act for the West Indies legend: the first man to smash an international T20 century, the first to hit a World Cup 200, the fastest century in the history of the game. He has hit twice as many T20 sixes as any other man and scored two Test triple centuries. All this is delivered with cricket's biggest bat and an even bigger smile. Off the pitch, millions follow him on Instagram and Twitter to catch a glimpse of a globe-trotting life spent in nightclubs as much as nets, hot-tubs as often as helmets and pads. He plays late, parties later, demolishes a king-size pile of pancakes and then strolls out to mangle another hapless bowling attack. But do we really know him? Do we know what took a shy, skinny kid from a cramped tin-roofed shack in the dusty back streets of Kingston, sharing a bed with three brothers and stealing empty bottles to buy food, to the very top of the cricket world - without losing himself along the way?

Outrageous and utterly original, this unputdownable memoir will leave you reeling. Welcome to the world of the Six Machine.

**The Glass Castle**

A groundbreaking book that pulls back the curtain on the terrorist movement no one is talking about Women's rights activist Laura Bates has been the target of many misogynistic attacks online: from hate-fueled
Twitter rants to vivid descriptions of her own rape and even death threats. At first, the vitriol seemed to be the work of a small handful of individual men but over time, the volume and consistency of the attacks hinted at something bigger and more ominous. As Bates followed the thread of online misogyny farther into the corners of the internet, the spiral of hateful and toxic rhetoric deepened until she found an unseen, organized movement of thousands of anonymous men wishing violence (and worse) upon women—the terrorism no one is talking about. Men Who Hate Women examines the rise of secretive extremist communities who despise women as Bates traces the roots of misogyny across a complex spider web of groups extending from Men's Rights Activists to trolls and the incel movement. Drawing parallels to other extremist movements around the world, including white nationalism, Bates shows what attracts men to the movement, how it grooms and radicalizes boys, how it operates, and what can be done to stop it. Most urgently of all, she follows the pathways this extreme ideology has taken from the darkest corners of the internet to emerge covertly in our mainstream media, our playgrounds, and our government. Going undercover on and offline, Bates provides the first comprehensive look at this under-the-radar phenomenon, including eye-opening interviews with former members of these communities, the academics studying this movement, and the men fighting back. By turns
fascinating and horrifying, Men Who Hate Women is a broad, unflinching account of the
depth current of loathing toward women and
anti-feminism that underpins our society and
is a must-read for parents, educators, and
anyone who believes in equality for women.
"Men Who Hate Women has the power to spark
social change."—Sunday Times

*An Amazon Best Book of the Year optioned for
television by Gabrielle Union!* In a series
of personal essays, prominent journalist and
LGBTQIA+ activist George M. Johnson explores
his childhood, adolescence, and college years
in New Jersey and Virginia. From the memories
of getting his teeth kicked out by bullies at
age five, to flea marketing with his loving
grandmother, to his first sexual
relationships, this young-adult memoir weaves
together the trials and triumphs faced by
Black queer boys. Both a primer for teens
eager to be allies as well as a reassuring
testimony for young queer men of color, All
Boys Aren't Blue covers topics such as gender
identity, toxic masculinity, brotherhood,
family, structural marginalization, consent,
and Black joy. Johnson's emotionally frank
style of writing will appeal directly to
young adults.
AS SEEN ON NETFLIX. A classic he-said-she-said romantic comedy, with bonus content including a Q&A with the author. All I've ever wanted is for Juli Baker to leave me alone. For her to back off - you know, just give me some space. Juli has been making Bryce's life hell from the moment they met. All he wants is to live a normal life, without some crazy person mooning after him. The first day I met Bryce Loski, I flipped. Honestly, one look at him and I became a lunatic. It's his eyes. But she doesn't see it that way. In her eyes, they're meant for each other, even though he might not realize it yet. That is, until the eighth grade, when everything flips. And just as Juli starts to realize that Bryce may not be all he seemed, Bryce begins to think that there's more to Juli than meets the eye . . . Wendelin Van Draanen's Flipped is a modern-day classic about first love and not judging a book by it's cover. A romantic comedy-of-errors told in alternating chapters by two fresh, funny voices.

**Not Quite What I Was Planning**

Don't go in the attic. Eight-year-old Hazel and her little sister, Bess, have more than 100 rules to follow while visiting their grandparents' farmhouse for the summer. But the biggest one is not to go into the attic. So, of course, that's also the first one
Hazel's 6-year-old sister decides to break. But the girls never expected to uncover a family secret that involves a hidden time machine and their mysterious (and grumpy) grandpa. They also never expected they'd be traveling through time, meeting historical figures, dodging danger, and learning all about the very events that helped shape history. In the first book, the girls travel to 1738 to meet a young George Washington.

**Klara and the Sun**

Examines the critical art of rethinking: learning to question your beliefs and to know what you don't know, which can position you for success at work and happiness at home. It is a book about the benefit of doubt, and about how we can get better at embracing the unknown and the joy of being wrong.

**Machines Like Me**

From two-time Newbery award-winning author Katherine Paterson. When Lyddie and her younger brother are hired out as servants to help pay off their family farm's debts, Lyddie is determined to find a way to reunite her family once again. Hearing about all the money a girl can make working in the textile mills in Lowell, Massachusetts, she makes her way there, only to find that her dreams of returning home may never come true. The Righteous Mind

New from Ian McEwan, Booker Prize winner and international bestselling author of Atonement and The Children Act Machines Like Me takes place in an alternative 1980s London. Charlie, drifting through life and dodging full-time employment, is in love with Miranda, a bright student who lives with a terrible secret. When Charlie comes into money, he buys Adam, one of the first synthetic humans and—with Miranda's help—he designs Adam's personality. The near-perfect human that emerges is beautiful, strong, and clever. It isn't long before a love triangle soon forms, and these three beings confront a profound moral dilemma. In his subversive new novel, Ian McEwan asks whether a machine can understand the human heart—or whether we are the ones who lack understanding.
Lab Girl

In this loose retelling of Howard's End, Zadie Smith considers the big questions: Why do we fall in love with the people we do? Why do we visit our mistakes on our children? What makes life truly beautiful? Set in New England mainly and London partly, On Beauty concerns a pair of feuding families—the Belseys and the Kippses—and a clutch of doomed affairs. It puts low morals among high ideals and asks some searching questions about what life does to love. For the Belseys and the Kippses, the confusions—both personal and political—of our uncertain age are about to be brought close to home: right to the heart of family.

The Hate U Give

Max is used to being called Stupid. And he is used to everyone being scared of him. On account of his size and looking like his dad. Kevin is used to being called Dwarf. On account of his size and being some cripple kid. But greatness comes in all sizes, and together Max and Kevin become Freak The Mighty and walk high above the world. An inspiring, heartbreaking, multi-award winning international bestseller.

A Little Life
#1 New York Times bestselling author Gordon Korman's tale of a boy who doesn't know who he is anymore... literally.

**Freak the Mighty**

Deceptively simple and surprisingly addictive, Not Quite What I Was Planning is a thousand glimpses of humanity—six words at a time. One Life. Six Words. What's Yours? When Hemingway famously wrote, "For Sale: baby shoes, never worn," he proved that an entire story can be told using a half dozen words. When the online storytelling magazine SMITH asked readers to submit six-word memoirs, they proved a whole, real life can be told this way too. The results are fascinating, hilarious, shocking, and moving. From small sagas of bittersweet romance ("Found true love, married someone else") to proud achievements and stinging regrets ("After Harvard, had baby with crackhead"), these terse true tales relate the diversity of human experience in tasty bite-sized pieces. From authors Jonathan Lethem and Richard Ford to comedians Stephen Colbert and Amy Sedaris, to ordinary folks around the world, everyone has a six-word story to tell.

**The Years That Matter Most**

A LOCUS AWARD FINALIST! The mesmerizing adult debut from Leigh Bardugo, a tale of power,
privilege, dark magic, and murder set among the Ivy League elite Galaxy “Alex” Stern is the most unlikely member of Yale’s freshman class. Raised in the Los Angeles hinterlands by a hippie mom, Alex dropped out of school early and into a world of shady drug-dealer boyfriends, dead-end jobs, and much, much worse. In fact, by age twenty, she is the sole survivor of a horrific, unsolved multiple homicide. Some might say she’s thrown her life away. But at her hospital bed, Alex is offered a second chance: to attend one of the world’s most prestigious universities on a full ride. What’s the catch, and why her? Still searching for answers, Alex arrives in New Haven tasked by her mysterious benefactors with monitoring the activities of Yale’s secret societies. Their eight windowless “tombs” are the well-known haunts of the rich and powerful, from high-ranking politicos to Wall Street’s biggest players. But their occult activities are more sinister and more extraordinary than any paranoid imagination might conceive. They tamper with forbidden magic. They raise the dead. And, sometimes, they prey on the living.

**How We Got to Now**

The Time Machine is a science fiction short story by H. G. Wells, published in 1895 and written as a landmark story. The work is
generally credited with popularizing the concept of time travel using a vehicle or device to consciously and selectively travel forward or backward through time.

**Think Again**

Groundbreaking new research shows that by grabbing hold of the three-step "loop" all habits form in our brains--cue, routine, reward--we can change them, giving us the power to take control over our lives. "We are what we repeatedly do," said Aristotle. "Excellence, then, is not an act, but a habit." On the most basic level, a habit is a simple neurological loop: there is a cue (my mouth feels gross), a routine (hello, Crest), and a reward (ahhh, minty fresh).

Understanding this loop is the key to exercising regularly or becoming more productive at work or tapping into reserves of creativity. Marketers, too, are learning how to exploit these loops to boost sales; CEOs and coaches are using them to change how employees work and athletes compete. As this book shows, tweaking even one habit, as long as it's the right one, can have staggering effects. In *The Power of Habit*, award-winning New York Times business reporter Charles Duhigg takes readers inside labs where brain scans record habits as they flourish and die; classrooms in which students learn to boost their willpower; and boardrooms where
executives dream up products that tug on our deepest habitual urges. Full of compelling narratives that will appeal to fans of Michael Lewis, Jonah Lehrer, and Chip and Dan Heath, The Power of Habit contains an exhilarating argument: our most basic actions are not the product of well-considered decision making, but of habits we often do not realize exist. By harnessing this new science, we can transform our lives.

**The Invention of Hugo Cabret**

Two starcrossed magicians engage in a deadly game of cunning in The Night Circus, the spellbinding New York Times best seller that has captured the world's imagination. The circus arrives without warning. No announcements precede it. It is simply there, when yesterday it was not. Within the black-and-white striped canvas tents is an utterly unique experience full of breathtaking amazements. It is called Le Cirque des Rêves, and it is only open at night. But behind the scenes, a fierce competition is underway: a duel between two young magicians, Celia and Marco, who have been trained since childhood expressly for this purpose by their mercurial instructors. Unbeknownst to them both, this is a game in which only one can be left standing. Despite the high stakes, Celia and Marco soon tumble headfirst into love, setting off a domino effect of dangerous
consequences, and leaving the lives of everyone, from the performers to the patrons, hanging in the balance. Look for Erin Morgenstern's new novel, The Starless Sea, available now.

**Steve Jobs**

Read the book that inspired the movie! Sixteen-year-old Starr lives in two worlds: the poor neighbourhood where she was born and raised and her posh high school in the suburbs. The uneasy balance between them is shattered when Starr is the only witness to the fatal shooting of her unarmed best friend, Khalil, by a police officer. Now what Starr says could destroy her community. It could also get her killed. Inspired by the Black Lives Matter movement, this is a powerful and gripping novel about one girl's struggle for justice.

**Men Who Hate Women**

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course."
Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

**All Boys Aren't Blue**

A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence. "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet;
and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs The Book of Why.

**All Quiet on the Western Front**

A PBS Great American Read Top 100 Pick With extraordinary relevance and renewed popularity, George Orwell’s 1984 takes on new life in this edition. “Orwell saw, to his credit, that the act of falsifying reality is only secondarily a way of changing perceptions. It is, above all, a way of asserting power.”—The New Yorker

In 1984, London is a grim city in the totalitarian state of Oceania where Big Brother is always watching you and the Thought Police can practically read your mind. Winston Smith is a man in grave danger for the simple reason that his memory still functions. Drawn into a forbidden love affair, Winston finds the courage to join a secret revolutionary organization called The Brotherhood, dedicated to the destruction of the Party. Together with his beloved Julia, he hazards his life in a deadly match against the powers that be. Lionel Trilling said of Orwell’s
masterpiece, “1984 is a profound, terrifying, and wholly fascinating book. It is a fantasy of the political future, and like any such fantasy, serves its author as a magnifying device for an examination of the present.” Though the year 1984 now exists in the past, Orwell’s novel remains an urgent call for the individual willing to speak truth to power.

**Teach Your Child to Read in 100 Easy Lessons**

The best-selling author of How Children Succeed returns with a powerful, mind-changing inquiry into higher education in the United States Does college still work? Is the system designed just to protect the privileged and leave everyone else behind? Or can a college education today provide real opportunity to young Americans seeking to improve their station in life? The Years That Matter Most tells the stories of students trying to find their way, with hope, joy, and frustration, through the application process and into college. Drawing on new research, the book reveals how the landscape of higher education has shifted in recent decades and exposes the hidden truths of how the system works and whom it works for. And it introduces us to the people who really make higher education go: admissions directors trying to balance the class and balance the budget, College Board officials scrambling to
defend the SAT in the face of mounting evidence that it favors the wealthy, researchers working to unlock the mysteries of the college-student brain, and educators trying to transform potential dropouts into successful graduates. With insight, humor, and passion, Paul Tough takes readers on a journey from Ivy League seminar rooms to community college welding shops, from giant public flagship universities to tiny experimental storefront colleges. Whether you are facing your own decision about college or simply care about the American promise of social mobility, The Years That Matter Most will change the way you think--not just about higher education, but about the nation itself.

**Out of My Mind**

Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

**The Sneetches and Other Stories: Read & Listen Edition**

This book is a celebration of ideas: how they happen and their sometimes unintended results. Johnson shows how simple scientific breakthroughs have driven other discoveries.
through the network of ideas and innovations that made each finding possible. He traces important inventions through ancient and contemporary history, unlocking tales of unsung heroes and radical revolutions that changed the world and the way we live in it.

**Fahrenheit 451 [TV Tie-In Edition]**

Easy-to-apply, scientifically-based approaches for engaging students in the classroom. Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals—the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom. Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts. How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents—anyone who cares about how we learn—should find his book valuable reading." —Wall Street Journal
The Power of Habit

"Written during the last years of the Weimar Republic, the two novels collected here address the urgent problems of that age. Both Erich Maria Remarque (1898–1970) and Joseph Roth (1894–1939) served in World War I, Remarque with the German army and Roth with the Austrian. Their experiences would help define what Gertrude Stein referred to as the "Lost Generation." All Quiet on the Western Front is the testimony of a soldier who had become aware of how much he, and those of his generation who had survived, had been affected by the trauma of the Great War. For Joseph Roth, World War I had cost him his homeland and turned him into a nomad. Job, in abridged form for The German Library, addresses the theme of Jewish identity in a newly mobilized society."--Jacket.

Secrets

A step-by-step program that shows parents, simply and clearly, how to teach their child to read in just 20 minutes a day.

1984

Draws on more than forty interviews with Steve Jobs, as well as interviews with family members, friends, competitors, and colleagues to offer a look at the co-founder and leading
creative force behind the Apple computer company.

**Six Machine**

FINALIST FOR 2018 KIRKUS PRIZE NAMED ONE OF THE "BEST LITERARY FICTION OF 2018' BY KIRKUS REVIEWS "Sci-fi in its most perfect expressionReading it is like having a lucid dream of six years from next week, filled with people you don't know, but will." --NPR "[Williams's] wit is sharp, but her touch is light, and her novel is a winner." - San Francisco Chronicle "Between seasons of Black Mirror, look to Katie Williams' debut novel." --Refinery29 Smart and inventive, a page-turner that considers the elusive definition of happiness. Pearl's job is to make people happy. As a technician for the Apricity Corporation, with its patented happiness machine, she provides customers with personalized recommendations for greater contentment. She's good at her job, her office manager tells her, successful. But how does one measure an emotion? Meanwhile, there's Pearl's teenage son, Rhett. A sensitive kid who has forged an unconventional path through adolescence, Rhett seems to find greater satisfaction in being unhappy. The very rejection of joy is his own kind of "pursuit of happiness." As his mother, Pearl wants nothing more than to help Rhett--but is it for his sake or for
hers? Certainly it would make Pearl happier. Regardless, her son is one person whose emotional life does not fall under the parameters of her job—at not as happiness technician, and not as mother, either. Told from an alternating cast of endearing characters from within Pearl and Rhett's world, Tell the Machine Goodnight delivers a smartly moving and entertaining story about the advance of technology and the ways that it can most surprise and define us. Along the way, Katie Williams playfully illuminates our national obsession with positive psychology, our reliance on quick fixes. What happens when these obsessions begin to overlap? With warmth, humor, and a clever touch, Williams taps into our collective unease about the modern world and allows us see it a little more clearly.

The Night Circus

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family.
When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

**Tell the Machine Goodnight**

The hauntingly prophetic classic novel set in a not-too-distant future where books are burned by a special task force of firemen. 'Another indispensable classic' The Times ''Ray Bradbury's gift for storytelling reshaped our culture and expanded our world' Barack Obama Guy Montag is a fireman. His job is to burn books, which are forbidden, being the source of all discord and unhappiness. Even so, Montag is unhappy; there is discord in his marriage. Are books hidden in his house? The Mechanical Hound of the Fire Department, armed with a lethal hypodermic, escorted by helicopters, is ready to track down those dissidents who defy society to preserve and read books. The classic dystopian novel of a post-literate future, Fahrenheit 451 stands alongside Orwell's 1984
and Huxley's Brave New World as a prophetic account of Western civilization's enslavement by the media, drugs and conformity. Bradbury's powerful and poetic prose combines with uncanny insight into the potential of technology to create a novel which, decades on from first publication, still has the power to dazzle and shock.

**A Wrinkle in Time**

Working Backwards is an insider's breakdown of Amazon's approach to culture, leadership, and best practices from two long-time Amazon executives. Colin started at Amazon in 1998; Bill joined in 1999. In Working Backwards, these two long-serving Amazon executives reveal and codify the principles and practices that drive the success of one of the most extraordinary companies the world has ever known. With twenty-seven years of Amazon experience between them, much of it in the early aughts—a period of unmatched innovation that brought products and services including Kindle, Amazon Prime, Amazon Studios, and Amazon Web Services to life—Bryar and Carr offer unprecedented access to the Amazon way as it was refined, articulated, and proven to be repeatable, scalable, and adaptable. With keen analysis and practical steps for applying it at your own company—no matter the size—the authors illuminate how Amazon’s fourteen leadership
principles inform decision-making at all levels and reveal how the company’s culture has been defined by four characteristics: customer obsession, long-term thinking, eagerness to invent, and operational excellence. Bryar and Carr explain the set of ground-level practices that ensure these are translated into action and flow through all aspects of the business. Working Backwards is a practical guidebook and a corporate narrative, filled with the authors’ in-the-room recollections of what “Being Amazonian” is like and how it has affected their personal and professional lives. They demonstrate that success on Amazon’s scale is not achieved by the genius of any single leader, but rather through commitment to and execution of a set of well-defined, rigorously-executed principles and practices—shared here for the very first time.

**Working Backwards**

ONE OF THE BEST BOOKS OF THE YEAR The New York Times • The Washington Post • The Wall Street Journal • NPR • Vanity Fair • Vogue • Minneapolis Star Tribune • St. Louis Post-Dispatch • The Guardian • O, The Oprah Magazine • Slate • Newsday • Buzzfeed • The Economist • Newsweek • People • Kansas City Star • Shelf Awareness • Time Out New York • Huffington Post • Book Riot • Refinery29 •
Book Little Life follows four college classmates—broke, adrift, and buoyed only by their friendship and ambition—as they move to New York in search of fame and fortune. While their relationships, which are tinged by addiction, success, and pride, deepen over the decades, the men are held together by their devotion to the brilliant, enigmatic Jude, a man scarred by an unspeakable childhood trauma. A hymn to brotherly bonds and a masterful depiction of love in the twenty-first century, Hanya Yanagihara’s stunning novel is about the families we are born into, and those that we make for ourselves.

The Wednesday Wars

Chet Holmes has been called "one of the top 20 change experts in the country." He helps his clients blow away both the competition and their own expectations. And his advice starts with one simple concept: focus! Instead of trying to master four thousand strategies to improve your business, zero in on the few essential skill areas that make the big difference. Too many managers jump at every new trend, but don't stick with any of them. Instead, says Holmes, focus on twelve critical areas of improvement—one at a
time—and practice them over and over with pigheaded discipline. The Ultimate Sales Machine shows you how to tune up and soup up virtually every part of your business by spending just an hour per week on each impact area you want to improve. Like a tennis player who hits nothing but backhands for a few hours a week to perfect his game, you can systematically improve each key area. Holmes offers proven strategies for: Management: Teach your people how to work smarter, not harder Marketing: Get more bang from your Web site, advertising, trade shows, and public relations Sales: Perfect every sales interaction by working on sales, not just in sales The Ultimate Sales Machine will put you and your company on a path to success and help you stay there!

The Ultimate Sales Machine

NEW YORK TIMES BESTSELLER A GOOD MORNING AMERICA Book Club Pick! A magnificent new novel from the Nobel laureate Kazuo Ishiguro—author of Never Let Me Go and the Booker Prize–winning The Remains of the Day. Klara and the Sun, the first novel by Kazuo Ishiguro since he was awarded the Nobel Prize in Literature, tells the story of Klara, an Artificial Friend with outstanding observational qualities, who, from her place in the store, watches carefully the behavior of those who come in to browse, and of those
who pass on the street outside. She remains hopeful that a customer will soon choose her. Klara and the Sun is a thrilling book that offers a look at our changing world through the eyes of an unforgettable narrator, and one that explores the fundamental question: what does it mean to love? In its award citation in 2017, the Nobel committee described Ishiguro's books as "novels of great emotional force" and said he has "uncovered the abyss beneath our illusory sense of connection with the world."

**Lyddie**

National Bestseller Winner of the National Book Critics Circle Award for Autobiography A New York Times Notable Book Geobiologist Hope Jahren has spent her life studying trees, flowers, seeds, and soil. Lab Girl is her revelatory treatise on plant life—but it is also a celebration of the lifelong curiosity, humility, and passion that drive every scientist. In these pages, Hope takes us back to her Minnesota childhood, where she spent hours in unfettered play in her father’s college laboratory. She tells us how she found a sanctuary in science, learning to perform lab work “with both the heart and the hands.” She introduces us to Bill, her brilliant, eccentric lab manager. And she extends the mantle of scientist to each one of her readers, inviting us to join her in
observing and protecting our environment. Warm, luminous, compulsively readable, Lab Girl vividly demonstrates the mountains that we can move when love and work come together. Winner of the American Association for the Advancement of Science/Subaru Science Books & Film Prize for Excellence in Science Books Finalist for the PEN/E.O. Wilson Literary Science Writing Award One of the Best Books of the Year: The Washington Post, TIME.com, NPR, Slate, Entertainment Weekly, Newsday, Minneapolis Star Tribune, Kirkus Reviews

**Six Machine**

Dr. Seuss creates another timeless picture-book classic with The Sneetches and Other Stories. Are you a Star-Belly Sneetch or a Plain-Belly Sneetch? This delightful book contains four tales with deliciously subtle takes on how silly it is to be, well, silly. “The Sneetches,” “The Zax,” “Too Many Daves,” and “What Was I Scared Of?” make this energetic compilation a must-have for every library. Full of Dr. Seuss’s signature rhymes and unmistakable characters, it’s perfect for new and lifelong Seuss fans. This Read & Listen edition contains audio narration.
